MY STARLINK INSTALLER

INTERSIGNALS Sdn Bhd is a dynamic and innovative Bumiputera-owned company specializing in Communication & Security System Integration, with a focus on the oil, gas, and petrochemical sectors. Founded on the principles of delivering advanced technological solutions, we provide end-to-end system integration services to ensure seamless connectivity and security for our clients. With a team of highly skilled engineers, technicians, and project managers, we are committed to exceeding client expectations through excellence in project delivery and long-term support.

INTERSIGNALS SDN. BHD.

Mission

Our mission at INTERSIGNALS Sdn Bhd is to deliver world-class System Integration (SI) solutions that enhance the operational capabilities of our clients in key sectors such as telecommunications, security, oil, gas, and petrochemicals.

We are committed to:

⇒ **Providing Innovative and Reliable Solutions:** Delivering cutting-edge Communication, Security, IoT, and Telecommunication services that meet the evolving needs of industries, while integrating the latest advancements in technology.

⇒ **Ensuring Quality and Excellence:** Upholding the highest standards of quality through the implementation of **ISO 9001:2015** practices, ensuring consistent, efficient, and customer-centric outcomes across all projects.

⇒ **Promoting Sustainability:** Offering sustainable and energy-efficient solutions that contribute to environmental preservation and support the development of smart, green economies.

⇒ **Empowering Our Clients and Workforce:** Building strong, lasting partnerships with our clients by providing exceptional service, and continuously developing our employees through training, safety programs, and innovation-driven work culture.

⇒ **Contributing to National Progress:** Supporting Malaysia's industrial and technological growth by promoting Bumiputera participation and fostering knowledge transfer, contributing to the nation's Vision 2030.

Vision, Aim and Goals

VISION

INTERSIGNALS Sdn Bhd strives to be a leading System Integrator (SI), delivering innovative and sustainable solutions across Communication, Security, IoT, and Telecommunication sectors. We are committed to supporting Malaysia's industrial growth and Bumiputera participation, while expanding our presence globally. In alignment with our commitment to quality, we aim to achieve ISO 9001:2015 certification to ensure top-tier operational excellence and customer satisfaction.

GOALS

⇒ **Support National Development:** Play a key role in Malaysia's Vision 2030 by contributing to infrastructure and industrial projects, particularly in oil, gas, and petrochemicals.

⇒ **Deliver Innovative Solutions:** Provide cutting-edge technology services in system integration, focusing on advancements in IoT, AI, and smart cities.

⇒ **Achieve ISO 9001:2015 Certification:** Implement and maintain quality management systems that ensure consistent, high-quality service delivery.

⇒ **Promote Sustainability:** Integrate eco-friendly, energy-efficient solutions into our offerings, supporting a greener economy.

⇒ **Foster Client Satisfaction:** Exceed client expectations through customized, reliable solutions and strong after-sales support.

⇒ **Ensure Safety and Quality:** Uphold strict safety standards while delivering high-quality

Work Force

Our team comprises highly experienced and qualified professionals, including management personnel, engineers, and technical staff, who work closely with clients to deliver exceptional system integration solutions. With a wealth of knowledge, experience, and information, our team has built strong channels and connections with unique, unlimited resources—enhancing our capabilities and strength to levels envied by many and rivaled by none. Confident in our expertise, we are true professionals, ready to face any challenge or obstacle, regardless of boundaries.

Safety is a fundamental priority in the selection and development of our staff. Through exposure to multi-environment working conditions and undergoing CIDB safety training, we proudly affirm that we are the 'right kind of people for the job.'

We take pride in delivering unparalleled customer service, expertise, and professionalism, ensuring that each client's unique needs are met. This commitment is supported by a progressive management style that fosters a quality-focused culture throughout INTERSIGNALS Sdn Bhd. As a System Integrator (SI), we are dedicated to building and maintaining client partnerships that add value and consistently exceed expectations. Our aim is to provide the highest standards of quality and service, ensuring maximum client satisfaction and attention to detail in every project.

Project Management Services

At **INTERSIGNALS Sdn Bhd**, our Project Management services are designed to ensure the successful execution of projects from inception to completion. We employ a systematic approach that emphasizes planning, organization, and coordination to meet our clients' unique needs and objectives.

Key Services Include:

⇒ Project Planning: We develop comprehensive project plans that outline objectives, timelines, resource allocation, and budgets to ensure clarity and direction.

⇒ Resource Management: Our team efficiently manages human, material, and financial resources to optimize project performance and ensure timely delivery.

⇒ Risk Management: We identify potential risks and implement mitigation strategies to minimize their impact on project timelines and budgets.

⇒ Quality Assurance:We uphold high standards of quality throughout the project lifecycle, conducting regular inspections and evaluations to ensure compliance with industry standards.

⇒ Stakeholder Communication: Effective communication is crucial for project success. We maintain transparent communication with all stakeholders, providing regular updates and addressing concerns promptly.

⇒ Performance Monitoring: Our team continuously monitors project progress against established benchmarks, making necessary adjustments to keep the project on track.

By leveraging our expertise in project management, INTERSIGNALS Sdn Bhd aims to deliver projects that meet or exceed client expectations, ensuring satisfaction and long-term success.

Towards

TELECOMMUNICATION SERVICES

Telecommunications Services

At INTERSIGNALS Sdn Bhd, we provide a comprehensive range of **Telecommunications Services** designed to meet the evolving connectivity needs of businesses across various sectors. Our solutions focus on enhancing communication infrastructure, ensuring reliability, and promoting operational efficiency.

Key Services Include:

⇒ **Network Design and Implementation:** We offer tailored network design solutions that cater to specific business requirements, ensuring seamless connectivity and optimal performance.

⇒ **Telecommunication System Integration:** Our team specializes in integrating various telecommunication systems, including voice, data, and video solutions, to create a cohesive and efficient communication environment.

⇒ **Infrastructure Development:** We manage the development and installation of telecommunication infrastructure, including towers, cabling, and equipment, ensuring robust and reliable connectivity.

⇒ **Voice Communication Solutions:** We provide a range of voice communication services, including VoIP solutions, traditional telephony, and unified communications systems that enhance collaboration and reduce costs.

⇒ **Data Services:** Our data services include broadband solutions, dedicated internet access, and secure data transmission services to support business operations and facilitate data-driven decision-making.

⇒ **Maintenance and Support:** We offer ongoing maintenance and technical support services to ensure the optimal performance of telecommunication systems, helping clients stay connected without interruptions.

By leveraging our expertise in telecommunications, INTERSIGNALS Sdn Bhd aims to empower businesses with the connectivity solutions they need to thrive in today's fast-paced digital world.

System Integrator IoT Services

At **INTERSIGNALS Sdn Bhd**, our **System Integrator (SI) IoT Services** are designed to seamlessly connect devices, systems, and applications to enhance operational efficiency and data-driven decision-making. We provide end-to-end IoT solutions tailored to meet the specific needs of our clients across various industries.

Key Services Include:

⇒ **IoT Solutions Development:** We design and develop customized IoT solutions that integrate various devices and sensors, enabling real-time data collection and monitoring.

⇒ **System Integration:** Our team specializes in integrating IoT systems with existing infrastructure, ensuring smooth interoperability between different technologies and platforms.

⇒ **Data Analytics and Visualization:** We leverage advanced analytics tools to transform raw data into actionable insights, helping clients make informed decisions based on real-time information.

⇒ **Cloud Services:** We offer cloud-based solutions that enable secure data storage, management, and accessibility from anywhere, facilitating enhanced collaboration and flexibility.

⇒ **Security Solutions:** Our IoT services include robust security measures to protect sensitive data and ensure the integrity of connected devices, safeguarding against cyber threats.

⇒ **Maintenance and Support:** We provide ongoing support and maintenance services to ensure the continued performance and reliability of IoT systems, helping clients maximize their investments.

By harnessing the power of IoT technology, INTERSIGNALS Sdn Bhd aims to drive innovation and efficiency for our clients, enabling them to stay ahead in a rapidly evolving digital landscape.

SERVICES

COMPREHENSIVE CORROSION CONTROL & RISK-BASED MAINTENANCE SOLUTIONS

At Intersignals Sdn Bhd, we specialize in protecting critical industrial assets through advanced Corrosion Control & Risk-Based Maintenance (RBM) solutions. Our approach minimizes downtime, enhances reliability, and ensures compliance with industry standards, helping businesses optimize maintenance strategies and reduce operational risks.

Our Expertise in Corrosion Control

Corrosion poses a significant threat to industrial infrastructure, leading to costly repairs, structural failures, and safety hazards. Our advanced **corrosion protection** solutions effectively mitigate these risks and extend asset lifespan.

⇒ **Protective Coatings & Surface Treatment**
⇒ **Cathodic Protection Systems (Onshore & Offshore)**
⇒ **Corrosion Monitoring & Inspection**
⇒ **Material Selection & Environmental Control**
⇒ **Blasting & Painting Services**
⇒ **Online Monitoring Systems**

Risk-Based Maintenance (RBM):

A Smarter Approach to Asset Management

Traditional maintenance methods often lead to unnecessary downtime and expenses. Our Risk-Based Maintenance (RBM) framework prioritizes maintenance efforts using real-time risk assessments and data-driven insights, ensuring cost-effective and proactive asset management.

• **Asset Criticality Assessment**
• **Predictive & Preventive Maintenance**
• **Failure Mode & Risk Analysis**

Why Choose Intersignals Sdn Bhd?

COMPREHENSIVE CORROSION CONTROL & RISK-BASED MAINTENANCE SOLUTIONS

Why Choose Intersignals Sdn Bhd?

"Intersignals Sdn Bhd is a trusted industry leader in Corrosion Control & Risk-Based Maintenance, backed by decades of expertise. We deliver cutting-edge solutions, integrating AI, IoT, and real-time monitoring to optimize asset performance, reduce downtime, and extend lifespan. Our advanced protective coatings, cathodic protection, and predictive maintenance strategies ensure maximum efficiency and compliance with global standards. Protect your critical infrastructure today with proven, cost-effective engineering solutions!"

⇒ **Industry Expertise** – Our personnel have been in the industry since the 1980s, serving both local and international projects.

⇒ **Comprehensive Solutions** – Covering overall Asset Management System (Asset Maintenance, Reliability, and Integrity).

⇒ **Cutting-Edge Technology** – Integration of AI, IoT, and real-time monitoring for proactive maintenance.

⇒ **Regulatory Compliance** – Adherence to ISO, NACE, and industry best practices.

⇒ **Cost-Effective Approach** – Optimized maintenance strategies that reduce downtime and extend asset lifespan.

TRACK RECORD & PROJECT EXPERIENCE

Why Choose Intersignals Sdn Bhd?

With a proven track record in **Cathodic Protection (CP), Corrosion Control, and Asset Integrity Management**, Intersignals Sdn Bhd (formerly NRI Engineering Sdn Bhd) has successfully delivered projects for both **local and international** clients across various industries, including **Oil & Gas, Petrochemicals, Power & Utilities, and Infrastructure**.

Some of our notable projects include:

Pipeline Integrity & Cathodic Protection Inspections

- **BP NamConSon Pipeline, Vietnam** – Close Interval Potential Survey (CIPS) & DCVG Inspection
- **Petrovietnam, Vietnam** – CP System Inspection & Upgrading
- **Petronas Gas Berhad, Malaysia** – CIPS for PGU 2 & PGU 3 Pipelines
- **PGU Pipeline, Kuantan, Malaysia** – CP Inspection

Corrosion Protection & Asset Integrity Solutions
- **ExxonMobil (Malaysia)** – Asset Integrity Engineering Services (5-year contract)
- **Brunei Methanol Corporation** – Project Management for Subsea Hose Replacement
- **Turkmenistan Pipeline** – Corrosion Monitoring & Pipeline Preservation
- **Talisman Energy (Malaysia)** – Coating & Topside Maintenance Consultancy

CP System Design, Installation & Commissioning
- **Petronas Gas Berhad (PRAI Lateral II Project, Malaysia)** – CP System Design & Commissioning
- **Sabah-Sarawak Gas Pipeline, Malaysia** – CP System Design Review
- **Cengkareng Airport, Indonesia** – CP System Upgrading

Our **decades of expertise** combined with **cutting-edge technology** ensure that we deliver **cost-effective, reliable, and high-performance** corrosion protection solutions for critical infrastructure worldwide.

FALCO™

Access Control Security System

INTERSIGNALS Sdn Bhd provides a comprehensive **Access Control Security System** designed to enhance the security of facilities while managing and monitoring entry points effectively. Our solutions offer flexibility, scalability, and advanced technology to safeguard assets and ensure the safety of personnel.

Key Features Include:

⇒ **Tailored Access Solutions:** We design customized access control systems to meet the unique security needs of various environments, including commercial, industrial, and residential settings.

⇒ **Keycard and Biometric Systems:** Our access control solutions utilize keycard systems and biometric authentication (such as fingerprint and facial recognition) to ensure secure and convenient access for authorized personnel.

⇒ **Remote Access Management:** Clients can manage access remotely through intuitive software platforms, enabling real-time monitoring and control of entry points from any location.

⇒ **Integration with Security Systems:** Our access control systems can be seamlessly integrated with existing security solutions, such as CCTV and alarm systems, providing a comprehensive approach to facility security.

⇒ **Visitor Management:** We offer visitor management features that allow organizations to track and manage guests effectively, enhancing overall security while ensuring a welcoming environment.

⇒ **Reporting and Analytics:** Our systems provide detailed reporting and analytics capabilities, allowing organizations to monitor access patterns and identify potential security concerns.

By implementing cutting-edge access control security systems, INTERSIGNALS Sdn Bhd aims to provide peace of mind for our clients, ensuring that only authorized individuals have access to critical areas while enhancing overall safety and security.

FALCO™

Falco ACS Product

FALCO Access Control Products provide a comprehensive range of access control solutions designed for enhanced security and access management across various environments, including commercial buildings, residential complexes, public facilities, and data centers. Here is a brief overview of key aspects of FALCO products: Key Services Include:

⇒ **Integrated Access Control Systems** FALCO products offer a full range of access control options, integrating smart cards, biometrics, and two-factor authentication for high flexibility and security in managing building entry and exit points.

⇒ **Biometric and Smart Card Authentication** FALCO offers biometric authentication devices like fingerprint and facial recognition scanners, along with access options via smart cards or tags, ensuring precise user control and minimizing the risk of unauthorized access.

⇒ **Management Software** FALCO includes management software that enables real-time monitoring and access control, complete audit reporting, and access scheduling for each user, which is essential for more efficient and detailed security management.

⇒ **Modular Design and Flexibility** FALCO products feature a modular design, making them easy to configure or expand according to the specific needs of an organization. They are suitable for small-scale buildings up to larger commercial structures.

⇒ **Industrial-Grade Durability and Quality** FALCO products are built with high-quality components that withstand extreme environments and frequent use, making them ideal for locations requiring 24/7 access control.

⇒ **Integration with Other Security Systems** FALCO can be integrated with CCTV, alarm systems, and other building management systems to provide an additional layer of security and centralized surveillance.

INTERSIGNALS SDN. BHD.

CCTV

(Closed-Circuit Television)

CCTV is a system that uses video cameras to transmit signals to a specific, limited set of monitors for surveillance and monitoring purposes. Unlike broadcast television, where signals are openly transmitted, CCTV provides a secure and private way to observe areas for security, safety, and operational purposes. Commonly used in residential, commercial, and industrial settings, CCTV systems can deter crime, provide real-time monitoring, and serve as valuable evidence in investigations. Modern CCTV systems often feature advanced technologies, including high-definition video, night vision, motion detection, and remote viewing capabilities through smartphones and computers.

Security Surveillance

Security surveillance encompasses a broader range of technologies and practices aimed at monitoring and protecting property, assets, and individuals. This includes not only CCTV systems but also alarms, access control systems, motion detectors, and security personnel. Security surveillance systems are designed to detect and respond to unauthorized access, theft, vandalism, and other threats. They can be integrated with advanced analytics, such as facial recognition and behavior analysis, to enhance security measures further. Effective security surveillance strategies involve a combination of technology, policies, and trained personnel to ensure a safe environment for businesses and individuals.

Bosch's PRAESENSA

The PRAESENSA public address and voice alarm system gets a new controller option, the PRA-SCS Small System Controller. This cost-effective alternative allows for optimization of the PRAESENSA system components to meet specific project needs, improving operational efficiency and reducing overall system cost. Particularly suited for mid-sized applications, the PRA-SCS Small System Controller offers more options to designing a tailored, value-oriented PRAESENSA solution across a wide range of installation sectors such as hospitality, education, retail stores and commercial buildings.

The Small System Controller oversees all system-related functions within an IP-based PRAESENSA system, including the routing of all audio connections between network-connected PRAESENSA audio sources and destinations. It handles calls, emergency alerts, collects device status information, and generates fault reports. Furthermore, it also plays back messages and tones stored on its flash memory and manages background music streams, business calls, and emergency calls based on priority level and zone occupancy. Equipped with an internal real-time clock, the controller can schedule events and features event time stamping, with support for Network Time Protocol (NTP) and automatic adjustment for Daylight Saving Time (DST).

Avigilon Product Suite

INTERSIGNALS Sdn Bhd is an authorized Avigilon Product Suite Partner specializing in system integration (SI) services. As a trusted partner, INTERSIGNALS Sdn Bhd provides end-to-end solutions, including system design, installation, integration, and maintenance of Avigilon's advanced security technologies.

INTERSIGNALS Sdn Bhd's expertise in integrating Avigilon's product suite into complex environments, coupled with their commitment to delivering exceptional quality, makes them a reliable partner for industries such as oil & gas, transportation, government, and critical infrastructure.

Avigilon, a Motorola Solutions company, offers an advanced suite of security and surveillance products designed to enhance safety and operational efficiency. Their solutions integrate cutting-edge artificial intelligence (AI) and innovative technologies to deliver powerful insights and proactive security measures.

1. Uninterruptible Power Supply (UPS)

INTERSIGNALS Sdn Bhd provides reliable **Uninterruptible Power Supply (UPS)** solutions to ensure continuous power for critical systems during outages. Our UPS systems safeguard sensitive equipment, minimize downtime, and maintain operational efficiency. We offer a range of UPS configurations, from small-scale units for individual devices to large systems for entire facilities, tailored to meet specific power needs.

2. Intercommunication System

Our **Intercommunication Systems** facilitate seamless communication within organizations, enhancing collaboration and operational efficiency. We design and implement intercom solutions that allow for clear audio and visual communication across various environments, ensuring that personnel can connect easily and respond quickly to any situation.

3. Master Clock and Timing System

INTERSIGNALS Sdn Bhd offers sophisticated **Master Clock and Timing Systems** that synchronize time across multiple devices and locations. These systems ensure accurate timekeeping for organizations, improving coordination and efficiency in operations. We provide solutions suitable for schools, hospitals, manufacturing facilities, and more.

4. Radio Paging System

Our **Radio Paging Systems** are designed to improve communication and alerting within organizations. We provide customized paging solutions that allow for instant communication across large areas, ensuring that important messages reach personnel quickly and efficiently. These systems are ideal for hospitals, warehouses, and industrial settings.

5. Traffic Light System

INTERSIGNALS Sdn Bhd specializes in the design and installation of **Traffic Light Systems** that enhance road safety and traffic management. Our solutions include programmable traffic signals, pedestrian crossing lights, and integrated control systems, ensuring smooth traffic flow and reducing congestion in urban areas.

6. Equipment, Material, and Manpower Supply

We offer comprehensive services in **Equipment, Material, and Manpower Supply**, providing businesses with the necessary resources to support their projects and operations. Our extensive inventory and skilled workforce ensure that clients receive high-quality materials and experienced personnel to meet their specific needs.

(Governments)

The services provided to various Kementerian in the Federal Government include comprehensive **System Integrations (SI)** solutions along with advanced security, access control, and surveillance systems. Key services include:

- **CARD ACCESS SYSTEMS**: Supplying and installing card access system parts, ensuring secure and efficient access management across government facilities.
- **CCTV WIRELESS SURVEILLANCE**: Designing, supplying, installing, testing, and commissioning wireless CCTV surveillance systems to provide real-time monitoring and enhanced security coverage.
- **FIBER OPTIC EQUIPMENT**: Installing and commissioning fiber optic equipment for high-quality audio and video feeds for LED TVs, improving internal communication and monitoring systems.
- **PERIMETER CCTV INSTALLATIONS**: Implementing perimeter CCTV systems to safeguard government facilities from external threats.
- **VISITORS' MANAGEMENT SYSTEM**: Providing monthly service and maintenance support for visitors' management systems, ensuring secure and seamless visitor handling.
- **DATA MIGRATION AND INTEGRATION**: Offering professional services to migrate and combine P2000 Access Control System (ACS) data into BDC servers, streamlining data management without data partition.
- **MAINTENANCE AND SUPPORT FOR INTEGRATED SECURITY SYSTEMS**: Delivering maintenance and support agreements for integrated intelligent security systems, including Access Control Management Systems (ACMS) and CCTV, to ensure ongoing system reliability and security.
- **SYSTEM INTEGRATIONS (SI) SERVICES**: Integrating various security and surveillance systems, ensuring seamless operation and communication between components like CCTV, card access, and visitor management systems for a unified security infrastructure.
- **VSMS IMPLEMENTATION AND SUPPORT**: Supplying, delivering, installing, integrating, testing, commissioning, and maintaining Video Surveillance Management Systems (VSMS) to ensure comprehensive and integrated video monitoring capabilities.

These services help federal ministries ensure robust security, streamlined operations, and effective system integration, contributing to the safety and efficiency of government facilities.

(Oil & Gas Industries)

The services provided to the Petronas Group, Shell Malaysia and ports in Selangor, Johor, and Terengganu include a range of security and surveillance solutions, ensuring the safety and efficiency of operations. These services encompass the supply, installation, and maintenance of advanced security systems such as:

- **CARD ACCESS SYSTEMS:** Supply and installation of card access system parts, including solutions for Petronas Gas Berhad (PGB) and Visitors' Management System support.
- **CCTV SURVEILLANCE:** Design, supply, installation, testing, and commissioning of CCTV wireless video surveillance systems, including perimeter surveillance and support for facilities like Melaka Fuel Terminal and PETRONAS Refinery Petrochemical Corporation.
- **FIBER OPTIC EQUIPMENT**: Installation, testing, and commissioning of fiber optic equipment for audio and video feeds for LED TVs, enhancing monitoring and communication systems.
- **SECURITY DATA MANAGEMENT**: Professional services for migrating and integrating P2000 Access Control System (ACS) data into BDC servers.
- **INTEGRATED SECURITY SYSTEMS**: Maintenance and support agreements for Access Control Management Systems (ACMS) and CCTV, ensuring continuous monitoring and security.
- **VSMS SERVICES**: Supply, delivery, installation, integration, testing, and commissioning of Video Surveillance Management Systems (VSMS) for Petronas and its group of companies.

These offerings include comprehensive support agreements to maintain the reliability of these systems across key Petronas facilities and terminals.

(Other`s Sector)

The services offered to State Government agencies, airports, local authorities (PBT), and companies such as **Telekom Malaysia, Siemens, ABB, SIRIM, and General Electric** include advanced security, system integration, and IoT technologies. Key services provided are:

- **CARD ACCESS SYSTEMS**: Supplying and installing card access system components to ensure secure and efficient access control in facilities.
- **CCTV WIRELESS SURVEILLANCE SYSTEMS**: Designing, supplying, installing, testing, and commissioning wireless CCTV surveillance systems, such as at Melaka Fuel Terminal, providing real-time monitoring and enhanced security.
- **FIBER OPTIC EQUIPMENT**: Supplying, installing, testing, and commissioning fiber optic equipment for high-quality audio and video transmission, particularly for LED TV displays, supporting effective communication and monitoring.
- **PERIMETER CCTV INSTALLATIONS**: Implementing perimeter CCTV systems to safeguard large facilities and monitor external threats.
- **VISITOR MANAGEMENT SYSTEM SUPPORT**: Offering monthly service and maintenance for visitor management systems, ensuring smooth and secure handling of visitors in facilities.
- **DATA MIGRATION AND INTEGRATION**: Providing professional services to migrate and integrate P2000 Access Control System (ACS) data into BDC servers, allowing for centralized data management without disrupting existing systems.
- **INTEGRATED SECURITY SYSTEM MAINTENANCE**: Supporting and maintaining integrated security systems such as Access Control Management Systems (ACMS) and CCTV, ensuring the continuous and reliable operation of these systems.
- **SYSTEM INTEGRATIONS (SI) SERVICES**: Offering system integration solutions that connect and streamline various security systems, including CCTV, access control, and visitor management, ensuring efficient and unified system functionality.
- **IOT TECHNOLOGIES**: Implementing IoT-based solutions that enhance security and operational efficiency, such as smart surveillance cameras, IoT-enabled access control, and connected sensors for real-time monitoring and data analytics. These solutions enable predictive maintenance, automated alerts, and enhanced data-driven decision-making for facility security.
- **VSMS (VIDEO SURVEILLANCE MANAGEMENT SYSTEMS)**: Supplying, installing, integrating, testing, commissioning, and maintaining VSMS for advanced video monitoring and management, enhancing overall facility security.
- **CCTV SUPPORT AND MAINTENANCE**: Providing CCTV support and non-comprehensive maintenance services for large industrial facilities, such as PETRONAS and PCOGD, ensuring optimal system performance and security.

These services are designed to offer comprehensive security and operational solutions, leveraging both system integration and IoT technologies to enhance safety, efficiency, and data connectivity across critical infrastructures and industrial sectors.
